

Cnding automatic stretching machine

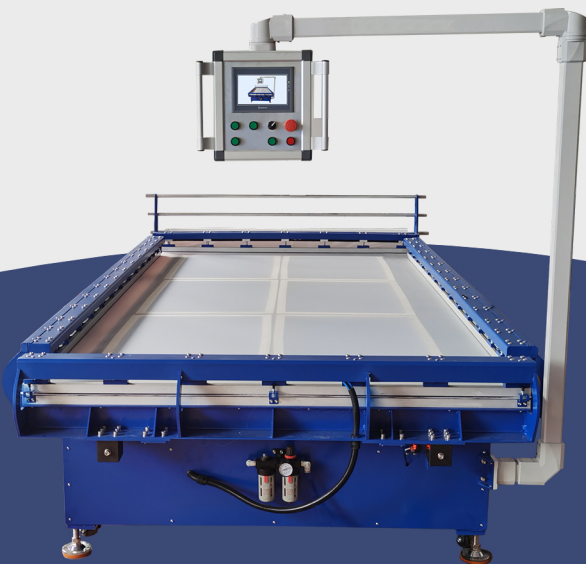

A star product in screen frame making industry

model	PM-3M
Maximum stretching area	1500*3080mm
Maximum stretching tension	60N/CM
Air pressure	0.5~0.8MPa
Power Supply	Three phase 380V/50Hz
Maximum power	2.3KW
Weight	1250Kg
Machine Size	W1920*L3520*H1840mm

Cnding automatic stretching machine

A star product in screen frame making industry

Machine Feature

- 1 Maximum stretching area is 1500*3080mm
- 2 It only need one worker to operate machine with high productivity. Multiple screen frame are stretched at one time. 162 screen frames can be completed in 8 hours
- 3 The machine is made in steel with integrated welding, and is sturdy and durable. It is simple and beautiful with rotatable control panel, and built-in electric box.
- 4 The action sequence with length stretching and width stretching is adjustable. The machine is flexible ,and in high efficiency.
- 5 A variety of mesh parameters can be set and stored. It do not need to repeat settings.
- 6 The machine can be moved and placed at will, because it have the heavy-duty movable casters. It is flexible and practical.
- 7 Intelligent touch screen have the automatic stretching software, which can intelligently control all stretching functions in order to obtain the high output and reduce the consumption of mesh.
